 - ⇒ Snowmelt and Weather Monitoring for Flood Predictions in Colorado
 - ⇒ Evacuation Map Book, lessons learned from Wildfire Evacuation Exercise
- Thursday's Workshop—Recovering from a Disaster—The Recovery Process in Colorado

Keynote Speaker

Ron Lane, Director of the County of San Diego's Office of Emergency Services since Feb 2006, was the Director of the County's Emergency Operations Center during the recent 2007 Firestorm. Ron and his staff coordinate the overall County response to disasters. The Office of Emergency Services is responsible for alerting and notifying appropriate agencies when the disaster strikes; coordinates all agencies that respond; ensures resources are available and mobilized in times of disasters; and develops plans for response and recovery from disasters. He joined the county in April 1989 after receiving a Master's in Public Administration from San Diego State University. His assignments in the County include working for Planning and Land Use, the North County Municipal Court, Public Safety Group and the Department of Child Support Services.

Ron Lane will present an overview of the devastating 2007 San Diego Firestorm that burned over 360,000 acres, and resulted in over 1,700 homes being destroyed and 10 deaths. Special emphasis will be on the successful evacuation of over 500,000 residents; establishment of over 45 evacuation shelters, including 2 mega-shelters; how 3 hospitals were evacuated; and how public communications were maintained throughout the disaster. The presentation also provides six key lessons learned during the firestorm and the recovery phase that will assist other emergency managers in their preparations.

Registration Notes

\$135 REGISTRATION
includes lunch for all three days & breakfasts on Wednesday & Thursday.
REGISTRATION DEADLINE:
February 10, 2009
Conference Check-In begins Tuesday, February 24 at 8:00 a.m.
Conference begins at 9:30 a.m.
