EMERGENCY MANAGERS RECEIVE C.E.M.[®] CREDENTIAL

Sixty-two candidates have been approved by the IAEM USA-Certification Commission to receive the Certified Emergency Manager[®] (CEM[®]) credential (*editors: see the attached list to use as a sidebar*). The CEM[®] designation is the highest honor of professional achievement available from the International Association of Emergency Managers (IAEM), which has in its membership more than 4,500 emergency managers representing local, state, and federal government; private industry; and military emergency managers. The new class of CEM[®]'s join the 1,578 other emergency managers who were approved for the designation since January, 1993 bringing the total number of Certified Emergency Managers[®] to 1,640.

Commission, Requirements

IAEM administers the program for the profession, and policy decisions and judgments are made by a Commission of respected professionals in the field. The USA-CEM[®] Commission met February 21-25, 2011 and approved applicants who successfully completed an extensive credentials package, a management essay and a written examination. The credentials requirements include experience, references, education, training, and contributions to the profession. The management essay requires respondents to submit a response to a scenario they might face while fulfilling emergency management responsibilities.

(more)

To maintain certification, CEM[®] recipients must submit additional training and contributions to the professional every five years.

CEM[®] Program

The emergency management certification program was developed over the last several years by IAEM with funding from the Federal Emergency Management Agency (FEMA) and guidance from an advisory board which included professionals from a variety of disciplines and representatives of key groups with a stake in emergency management.

Below: List of February 21-25, 2011 CEM Recipients
