

Kendall Dilling

Vice-President of Health, Safety, Environment & Regulatory

Kendall is Vice-President of Health, Safety, Environment & Regulatory for Cenovus Energy. Kendall is accountable for company-wide health, safety and environmental standards, processes and systems, and for driving our safety commitments across the company. In addition, Kendall and his team ensure Cenovus has the proper regulatory approvals and compliance assurance processes in place.

Kendall has worked in the oil and gas industry for nearly 25 years, with experience that spans health and safety, environment, regulatory, Aboriginal and stakeholder relations, and business development. He began his career in environmental consulting and then went on to the transmission pipeline sector, where he oversaw the regulatory approval process for numerous pipeline projects in Canada and the United States. Kendall then shifted into the upstream oil and gas industry, where he worked for several energy companies – ranging from small junior players to large multi-nationals.

Kendall holds three degrees from the University of Calgary – a Bachelor of Science, a Bachelor of Arts, and an MBA. Kendall remains actively engaged with various external organizations and currently sits on the Oil Sands and Alberta Executive Policy Groups at the Canadian Association of Petroleum Producers (CAPP), the steering committee of the Oil Sands Community Alliance (OSCA) and the Board of the Canadian Energy Research Institute (CERI). Kendall and his wife Karla have been married for over 23 years and live in Calgary with their four children.
