Essential manufacturing	Defence industry, heavy industry and chemicals

WHAT – Survey of security managers in these sectors

WHY –

- A more consistent approach to security along with emergency and disaster management in the APEC region [The United States is a member economy]
- The promotion of security standards and systems capacity which support business as well as critical infrastructure in times of emergency, helping to minimise impact on economies
- Harmonisation of related standards across the APEC region, which will help improve the interoperability and compatibility of systems related to securing critical infrastructure
- Improved technical capacity through ascertaining key areas of standardisation focus for the development of security standards
- The capacity to make more informed choices about effective security solutions through better access to information on tested and consistent methods to protect critical infrastructure

WHO – Managers who have responsibility for securing Critical Infrastructure

- Respondents will be asked their opinions on sector needs NOT information on their individual organizations

HOW – online, www.stancert.com – 1 October to 1 December 2008

QUESTIONS – Contact Dean Larson drlarson@jorsm.com, U.S. point of contact for this survey
